#### THE ONLY DISCOVERY WORTHY OF ANY CONFIDENCE FOR

Restoring THE BALD AND GRAY

Many, since the great discovery of Prof. Wood, have attempted not only to imitate his restorative, but pro-fees to have discovered something that would produce fees to have discovered something that would produce results identical; but they have all come and gone, being carried away by the wonderful results of Frof. Wood's preparation, and have been forced to leave the field to its resistless sway. Rend the following:

Bath. Maine. April 18th 1859.

Prof O. J. Wood & Co. Gents: The letter I wrote you in 1856, concerning your valuable Hair Restorative, and which you have published in this vicinity and elsewhere, has given rise to numerous inquiries touching.

Prof O. J. Wood & Co. Gents: The letter I wrote you in 1856. concerning your valuable Hair Restorative, and which you have published in this vicinity and elsewhere, has given rise to numerous inquiries touching the facts in the case. The inquiries are, first, is it a fact of my habitation and name, as stated in the communication; second, is it true of all therein contained; third does my hair still continue to be in good order and of natural color? To all I can and will answer invariably yes. My hair is even better than in any stage of my life for forty years past, more soft thrifty and better colored; the same is true of my whiskers, and the only cause why it is not generally true is that the substance is weshed off by frequent ablution of the face, when if care were used by wiping the face, in close connection with the whiskers, the same result will follow as the hair. I have been in the receipt of a great number of letters from all parts of New England, asking me if my hair still continues to be good; as there is so much fraud in the manufacture and sail of various compounds as well as this, it has no doubt been basely imitated and been used, not only without any good but to absolue injury. I have not used any of the case with the substance of any account for some months, and yes my hair is as good as ever, and hundreds have examined it with surprise, as I am now 61 years old and not a gray hair in my head or on my face; and to prove this fact. I send you a lock of my hair, taken off the past week. I received your favor of two quart bottles last Summer for which I am very grateful: I gave it to my triends and thereby induced them to try it, many were skepticle until after trial, and then purchased and used it with universal snacess. I will ask as a favor, that you send me a test by which I can discover fraud in the Resto attive, sold by many. I fear without authority from you. A pure article which curses the ininventor of the good. I deem it my duty as heretofore to keep you apprised of continued effect on m

world, the wonderful, as well as the unexpected result I have experienced from using one bottle of your Hair Restorative. After using every kind of Restoratives explant, but without success, and finding my head mearly oct itate or hair. I was finally induced to try a bottle of your Hair Restorative. Now candor and justice compel me to announce to whoever may read this, that I now possess a new and beautiful growth of hair, which I prohounce richer and kandsomer than the original was. I will therefore take occasion to recommend this invaluable remedy to ALL who may feel the necessisty of it.

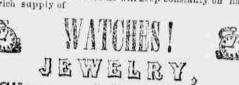

Respectfully yours, REV. S. ALLEN BROCK.
P. S. —This testimonal of my approbation for your valuable medicine (as you are aware of) is unsolicited in but if you think it worthy a place among the rest, insert if you wish; if not destroy and say nothing.

The Restorative is put up in bottles of three sizes, viz large medium, and small; the small holds is a pint and retails for one dollar per bottle; the mediums hold at least twenty per cent, more in proportion than the small costite for two dollars per bottle; the large holds a quart. 40 per cent, more in proportion and retails for 3t a bottle. 1st. The arrangement for broiling on the front hearth, an improvement overlooked in other first class stoves. It has also the same arrangement for broiling on top.

2d. A thorough ventilation of the Oven.

3d. Introducing hot air draught to the fire chamber, thereby increasing the draught of the Stove, quickening its operations, and enabling it to throw out more hear—a matter much and justly complained of in other Stoves.

4th. An important improvement in the application of matter much and justly complained of in other Stoves.

4th. An important improvement in the application of
the damper, which throws the heat around the oven.

5th. Much greater weight, consequently heavier plates,
and more durable as well as handsomer castings.

6th. A draft damper at each end of the fire box, so
that the fire is equalized, and one gridle will heat as quick
